PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER (Dynasas)

01/2025 – Present
Dubai & Gurugram

International Experience & Advanced Projects

- Worked on-site in **Dubai for 6 months**, collaborating directly with clients and stakeholders for project delivery and requirement alignment
- Contributed to the **AITs (Airport Intelligent Trolley System)** project, focusing on advanced indoor navigation and smart tracking solutions
- Designed and implemented an indoor mapping system for airport environments (similar to Google Maps) using:
 - WiFi RSSI-based positioning
 - Accelerometer sensor data for motion tracking
 - Kalman Filter for noise reduction and improved accuracy
 - K-Nearest Neighbors (KNN) algorithm for location estimation
- Developed and optimized **backend services using Node.js**, handling real-time location updates, device communication, and API architecture

Built an admin dashboard for monitoring and managing:

- Real-time trolley tracking
- User movement and navigation analytics
- System activity and operational insights

Implemented core features including:

- Real-time trolley tracking
- Indoor user navigation within airport premises
- Shortest path calculation between locations
- Integrated food ordering system within the airport environment

Real-Time Dating Application (Ximoo-dubai)

- Built a cross-platform dating app using **Node.js** and **React Native** for iOS and Android
- Developed real-time matchmaking logic using **Socket.io** based on preferences, age, gender, and distance
- Integrated **Agora SDK** for live video calling
- Implemented real-time chat and messaging features
- Used **MongoDB** to manage user profiles, matches, and interactions
- Delivered a seamless real-time user experience with optimized socket communication

FULL-STACK DEVELOPER (ANT CLOUD)

03/2024 – 01/2025
Delhi

- **Virtual PC Project**-Developed and managed a live project to create virtual PCs for both individual users and organizations. The system supports over 200 concurrent users, offering a hassle-free and fast computing experience for daily use.
- **Affiliate Dashboard Project**-Created a comprehensive dashboard for affiliate users. This tool tracks commissions, revenue generated from affiliate links, payout records, automated payments, and validates offers/coupon codes.
- **Organization Management Software**-Designed and implemented software to streamline the management of organizations and their users, enhancing overall operational efficiency.
- **AWS**- Worked on AWS Ec2 to deploy and manage cloud infrastructure, ensuring scalability and reliability.

FULL-STACK DEVELOPER (Easync Books)

04/2023 – 03/2024
Noida,UP

- Worked on Project from scratch to build a Accounting software to handle daily billing of more than 1000.Keeping track/creating/Storing/Calculation/Gst Billing.
- Providing different Access on basis of different user type (Admin/User/Sub-admin)
- Maintaining records and analytics on existing data to provide a great visual understanding of Sale/Purchase and expanses.
- Worked on Backend for crating API & handling Database
- Developed Email notification logs

Key Skills-React.js,Javascript,Node,Mongodb,Express,SQL

EDUCATION

B.TECH

G.L BAJAJ INSTITUTE OF TECHNOLOGY AND MANAGEMENT (CGPA-8.1)

2019 – 2023
Gr. Noida, UP

12th (CBSE)

GOVT BOYS SR. SEC SCHOOL NO-1 (Percentage-73%)

2017 – 2018
New Delhi

SKILLS

- | | | | |
|--------------|-----------|------------|----------------|
| • Node.js | • SQL | • React.js | • React-native |
| • Javascript | • MongoDB | • AWS | • C++ |

PROJECTS

Real-Time Dating & Matchmaking App

A cross-platform dating app with real-time user matching based on preferences, likes, and distance.

- Built a cross-platform dating app with Node.js and React Native for iOS and Android
- Developed real-time matchmaking logic using Socket.io [↗](#) based on likes, preferences, age, gender, distance etc..
- Integrated live video calling using Agora SDK
- Implemented real-time chat and messaging features
- Used MongoDB to manage user profiles, matches, and interactions
- Delivered seamless real-time user experience with socket-based communication and media features

Easync Books (ERP software)

Sync Books is an all-in-one accounting platform, similar to **Zoho Books, Tally erp**. built to streamline business finances. It enables vendor creation, professional invoice generation, and automated GST tracking. Users can manage and reconcile vendor bills using **BillPay, maintain audit trails, and file GST returns directly through the app with e-invoicing support**. The software also features role-based access and a powerful dashboard for real-time sales and purchase analytics. <https://www.easyncbooks.com/> [↗](#)

Factory Product Management System

- **QR Code Generation:** Automatically generated unique QR codes for each product.
- **Product Tracking:** Enabled real-time tracking and status updates for products throughout the production process.
- **QR Code Scanner:** Integrated scanner functionality to instantly navigate to product details.
- **Role-Based Access Control:** Implemented user roles to ensure secure and restricted access to specific features.

Affiliate users management

Created a comprehensive dashboard for affiliate users. This tool tracks commissions, revenue generated from affiliate links, payout records, automated payments, and validates offers/coupon codes.(React.js,Node.js,Mongodb)

Smart AI

It is an advanced voice assistant application that simplifies tasks through voice commands. This automated AI system responds to user instructions, providing tailored results. It boasts features such as article reading, opening links, and much more. Developed using a stack of cutting-edge technologies including React.js, Node.js, Express.js, ALAN AI, JavaScript, TypeScript, Material-UI, and Tailwind CSS, Smart AI offers a seamless and intelligent user experience.

Live video streaming app

Developed a Live Video Platform using **Socket.io**, accommodating 10,000+ concurrent users for live streaming, where people can do real-time commenting, sharing, and interactive discussions.

E-commercial Site

It is e-commercial website for selling items online. User can login and buy or add items to cart. Which is build using (React.js, Typescript, Redux, Tailwind CSS, Firebase and material.ui).

Talk Buddy

Talk Buddy is an instant messaging platform. It allows multiple users to chat in group or any two individuals to chat. Which is built using (React.js, Material UI, Firebase)

ACHIEVEMENTS

👉 Leetcode weekly contest 332 (Global Rank 1519 out of 25000 participants and All India Rank 229)

👉 Codechef Sep Lunchtime (Global Rank-669)

👉 Leetcode Weekly contest 322 (AIR-400)

👉 Codechef Jan Challenge (Global Rank-439)

👉 LEETCODE+GFG --- 500+ problems solved

👉 CODECHEF --- 3 Star

👉 Hacker rank --- 5 star
