PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER (Dynasas)

01/2025 – Present
Dubai & Gurugram

International Experience & Advanced Projects(AITS)

- Led a team of 6 developers, managing task distribution, technical guidance, code reviews, and coordination to ensure timely project delivery and smooth collaboration across teams
- Worked on-site in **Dubai for 4 months**, collaborating directly with clients and stakeholders for project delivery and requirement alignment
- Contributed to the **AITS (Airport Intelligent Trolley System)** project, focusing on advanced indoor navigation and smart tracking solutions
- Designed and implemented an indoor mapping system(AITS) for airport environments (similar to Google Maps) using:-WiFi RSSI-based positioning,Accelerometer,Gyroscope sensor data for motion tracking Kalman Filter for noise reduction and improved accuracy, K-Nearest Neighbors (KNN) algorithm for location estimation
- Architected and developed scalable **Node.js, Python** backend services and REST APIs for the Airport Intelligent Trolley System (AITs), powering real-time trolley tracking, indoor navigation, device telemetry ingestion, live monitoring, battery health management, predictive low-battery alerts, notification workflows, operational analytics, and administrative dashboards. Designed event-driven communication systems for processing high-frequency location and sensor data, implemented real-time tracking and alerting mechanisms, optimized database performance, and ensured high availability, scalability, and reliability across thousands of connected devices within airport environments.

Key Skills:- React.js, React Native , Node.js , pyhton, sql ,aws, docker, javascript.

Real-Time Dating Application (Ximoo)

- Developed a **Tinder-like** cross-platform dating application using React Native and Node.js, python, serving both iOS and Android users(**For dubai**).
- Designed and implemented intelligent **matchmaking algorithms** based on user preferences, age, gender, Height, location, and compatibility criteria.
- Built real-time chat, notifications, and match interactions using **Socket.io** 📡, ensuring low-latency communication and high user engagement.
- Integrated **Elastic search** to provide fast profile discovery, location-based search, and advanced user filtering capabilities.
- Integrated **Agora SDK** to enable high-quality one-to-one **video calling** within the platform.
- Developed secure backend APIs and business logic for user profiles, matching, swiping, messaging, and relationship management.
- Implemented real-time event processing and socket-based architecture to deliver a seamless and scalable user experience.

Key Skills:- React Native , Node.js ,pyhton, socket server, mongodb ,aws, javascript,agora sdk,elastic search.

FULL-STACK DEVELOPER (ANT CLOUD)

03/2024 – 01/2025
Delhi

• Virtual PC Project-

- Developed and maintained a cloud-based Virtual PC platform for individuals and enterprises, enabling secure remote access to virtual desktops and supporting 200+ concurrent users with high availability and performance.
- Designed scalable backend services, user management modules, and system monitoring features to ensure seamless and reliable operations.
- **Affiliate Dashboard Project**-Created a comprehensive dashboard for affiliate users. This tool tracks commissions, revenue generated from affiliate links, payout records, automated payments, and validates offers/coupon codes.
- **Organization Management Software**-Designed and developed an organization management platform for user administration, role-based access control, workflow automation, and operational management.
- Implemented scalable backend services, database architecture, and administrative dashboards to streamline business processes and improve productivity.
- **AWS**- Worked on AWS Ec2 to deploy and manage cloud infrastructure, ensuring scalability and reliability.

Key Skills:- React.js , node.js, mongodb,aws, javascript, physical servers.

FULL-STACK DEVELOPER (Easync Books)

11/2022 – 03/2024
Noida, UP

- Developed a full-scale Accounting and GST Billing platform (**Easync books**) from scratch, handling 1,0000+ daily transactions, invoicing, taxation, financial calculations, and record management.
- Designed and implemented secure Role-Based Access Control (**RBAC**) with Admin, Sub-Admin, and User permissions to ensure controlled access and data security.
- Built analytics and reporting modules to provide actionable insights into sales, purchases, expenses, cash flow, and business performance.
- Developed scalable Node.js backend services, REST APIs, and database architectures to support accounting operations, financial reporting, and data management.
- Implemented automated email notification and logging systems for invoices, payment reminders, transactional updates, and audit tracking.
- Optimized database queries and backend workflows to improve system performance, reliability, and data accuracy.
- Collaborated across the full software development lifecycle, from requirements gathering and system design to deployment and production support.

Key Skills-React.js, Javascript, Node, Mongodb, Express, SQL

FRONTEND DEVELOPER INTERN(Parentune.com)

03/2022 – 08/2022
Gurgaon, Haryana

- Worked on **Parentune.com**, a parenting platform that enables users to connect with doctors through online consultations, voice/video calls, and real-time chat, providing accessible healthcare guidance and parenting support.
- Migrated web project from JavaScript to TypeScript that reduced the sentry bugs by 4 times
- Developed a Design system using Reusable components that helped in scaling a project.
- Worked alongside with senior developers to complete tasks and flow like:- Creating new UI , fixing bugs and adding new features to website.
- Worked with Backend team for API integration.

Key Skills-React.js, Javascript, Typescript, Redux, API, HTML, CSS, Tailwind CSS

EDUCATION

B.TECH

G.L BAJAJ INSTITUTE OF TECHNOLOGY AND MANAGEMENT (CGPA-8.1)

2019 – 2023
Gr. Noida, UP

12th (CBSE)

GOVT BOYS SR. SEC SCHOOL NO-1 (Percentage-73%)

2017 – 2018
New Delhi

SKILLS

- | | | | |
|-----------------|-------------|--------------|---------------------------|
| • Node.js | • React.js | • Python | • React-native |
| • Next.js | • Fast Api | • SQL | • Javascript & Typescript |
| • MongoDB | • AWS | • Express.js | • C++ |
| • System design | • Team lead | | |

ACHIEVEMENTS

- | | |
|---|---|
| 🏆 Leetcode weekly contest 332 (Global Rank 1519 out of 25000 participants and All India Rank 229) | |
| 🏆 Codechef Sep Lunchtime (Global Rank-669) | 🏆 LEETCODE+GFG --- 500+ problems solved |
| 🏆 Leetcode Weekly contest 322 (AIR-400) | 🏆 CODECHEF --- 3 Star |
| 🏆 Codechef Jan Challenge (Global Rank-439) | 🏆 Hacker rank --- 5 star |
