Portfolio: sunny-kumar-ray-portfolio.netlify.app | Notice Period: Immediate

PROFESSIONAL SUMMARY

Java developer with 4+ years of experience designing and delivering high performance backend systems and modern full stack applications using **Java, Spring Boot, Microservices, React.js, Node.js, AWS, Docker, Apache Kafka, MySQL, PostgreSQL, MongoDB, and Redis**. Experienced in building REST APIs, microservices, secure authentication, and cloud native solutions across the full software development lifecycle in Agile teams.

PROFESSIONAL EXPERIENCE

Sr. Software Developer (Java Full stack) | Dynasas | Gurugram, India

Jan 2025 - Present

Project: AITS - Airport Intelligent Trolley System (Dubai International Airport)

- Architected the Airport Intelligent Trolley System as independently deployable **Java Spring Boot** microservices with an **API Gateway**, service discovery, and centralized configuration, enabling real time trolley tracking.
- Engineered backend services processing **WiFi RSSI**, accelerometer, and gyroscope data using a **Kalman Filter** and **KNN** algorithm, and built the **React Native** Android client for indoor navigation.
- Built secure backend services using **Spring Security**, **JWT** authentication, and role based access control, optimizing **SQL** queries and integrating **Redis** caching to reduce API latency by approximately 40 percent.
- Improved service resilience with **circuit breaker** and retry patterns, request timeouts, and graceful degradation, preventing cascading failures under load.
- Implemented the persistence layer with **Spring Data JPA** and **Hibernate** over **MySQL**, applying entity relationship mapping, transaction management, and index driven query tuning.
- Developed asynchronous, event driven services using **Apache Kafka** for notifications, activity tracking, and analytics, applying consumer groups and partitioning for parallel consumption.
- Secured media upload pipelines with **AWS S3** presigned URLs and **AWS Lambda**, and containerized all microservices using **Docker** for consistent development, testing, and production deployments.

Project: Ximoo - Cross Platform Dating Application (Dubai)

- Developed scalable **Java, Spring Boot**, and **Node.js** backend services and secure REST APIs for authentication, user profiles, matching, messaging, and relationship management using **Spring Security** and **JWT**.
- Delivered the cross platform client using **React Native**, serving both iOS and Android users.
- Built real time chat, notifications, and matchmaking services using **Socket.IO**, delivering low latency user interactions.
- Integrated **Elasticsearch** for high performance profile discovery, location based search, and advanced filtering.
- Optimized **MongoDB** data models and backend services, applying compound indexing and aggregation pipelines to improve application scalability and API performance.
- Implemented API rate limiting, pagination, and **Redis** backed caching for frequently accessed profile and match data, reducing repeated database reads.

Key Skills: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, Microservices, REST APIs, React Native, Node.js, MySQL, MongoDB, Elasticsearch, Socket.IO, Apache Kafka, Redis, Docker, AWS, JUnit, Mockito.

Software Developer(Java Full stack) | Ant Cloud | Delhi, India

Mar 2024 - Jan 2025

- **Virtual PC Platform:** Developed scalable **Java Spring Boot** backend services and REST APIs for a cloud based virtual desktop platform, supporting secure remote access for 200 plus concurrent users.
- Designed backend modules for user management, authentication, system monitoring, and database architecture, alongside responsive **React.js** interfaces.
- **Affiliate Dashboard:** Built secure backend APIs and business logic for commission tracking, automated payouts, coupon validation, and revenue analytics, surfaced through interactive **React.js** dashboards for affiliate management.
- **Organization Management Platform:** Engineered scalable backend services for RBAC, workflow automation, and operational management, along with administrative dashboards using **React.js**.
- Optimized database queries and backend workflows, improving application performance, scalability, and overall system reliability.
- Deployed and managed applications on **AWS EC2** and **Linux** servers, ensuring scalable, secure, and highly available production environments.

Key Skills: Java, Spring Boot, React.js, Node.js, MongoDB, AWS EC2, JavaScript, Linux.

Full Stack Developer | Easync Books | Noida, India

Aug 2022 - Mar 2024

- Built the **Easync Books** accounting and GST billing platform from scratch, handling 10,000 plus daily transactions across invoicing, taxation, financial reporting, and record management.
- Designed and developed scalable **Java Spring Boot** and **Node.js** backend services, REST APIs, and database architecture supporting accounting operations and business workflows.
- Implemented secure **Role Based Access Control (RBAC)** with Admin, Sub Admin, and User roles, ensuring controlled access and data security.
- Delivered interactive **React.js** dashboards for analytics, invoicing, reporting, and financial insights.
- Automated email notifications, payment reminders, audit logging, and background processing for transactional workflows.
- Optimized **MySQL** queries, database workflows, and backend performance, improving application scalability, reliability, and response times.

Key Skills: Java, Spring Boot, React.js, Node.js, JavaScript, MongoDB, MySQL.

TECHNICAL SKILLS

Languages: Java (8, 11, 17), JavaScript, TypeScript, SQL

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT, OAuth 2.0, Node.js, Socket.IO, Elasticsearch, Maven

Frontend: React.js, React Native, Next.js, Redux, Context API, Material UI

Databases: MySQL, PostgreSQL, MongoDB, Redis, Query Optimization, Indexing

Cloud and DevOps: AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, Apache Kafka, Kafka Streams, Linux, CI/CD

Testing and Tools: JUnit, Mockito, Postman, Git, Maven, Swagger

Concepts: Data Structures and Algorithms, OOP, System Design, Design Patterns, Multithreading and Concurrency, Agile, Scrum

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

2019 - 2023

G.L. Bajaj Institute of Technology and Management, Greater Noida, India | CGPA: 8.1

ACHIEVEMENTS

- Solved 500 plus data structures and algorithms problems across LeetCode and GeeksforGeeks.
- LeetCode Weekly Contest 332: All India Rank 229 (Global Rank 1519 of 25,000 participants).
- LeetCode Weekly Contest 322: All India Rank 400.
- CodeChef 3 Star and HackerRank 5 Star.
- CodeChef Lunchtime Global Rank 669, Jan Challenge Global Rank 439.
